

Almond FinTech
Technical Product Manager - Almond Credit Scoring
Job Post

About Us

Almond is a fintech startup born out of MIT and Harvard that creates economic development through mobile financial inclusion. In partnership with local financial institutions, Almond provides access to essential financial technology services such as remittances using a blockchain-based funds transfer infrastructure as well as alternative credit scoring. Our remote team of fifteen is growing globally, and we're seeking to add more smart and talented people, including a Technical Product Manager.

Role

The technical product manager will be at the intersection of software development and product management. This role will work with the existing in house engineering team as well as contractors to further improve upon the product. Additionally, the PM will interface with our partners to ensure that the feedback is effectively communicated to the development team.

The ideal candidate is able to work in a fast-paced environment, supporting multiple concurrent projects and has excellent written and verbal communication skills in a multi-team, collaborative environment. The candidate is expected to work with team members and partners across different time zones.

The ideal candidate has 5+ years of experience in

- Working across product and engineering departments and managing teams
- Software development in Java and Ruby on Rails
- Spring Boot Framework
- AWS services
- CI/CD tools (across GitLab, Docker, Kubernetes)
- Data structures and relational databases (MySQL, Postgres)
- REST API development
- Solid understanding of Object Oriented Programming (OOP)
- Experience with data analytics and visualization a plus but not a requirement

Responsibilities

- Manage a contractor development team and in house engineer to develop Almond's credit scoring software (ACS)
- Work with the product lead and external partners to understand product requirements and the lead the step by step process to execution (project management)
- Take initiative and work with the development team to determine how features should be implemented in the platform
- Lead the transition of Almond's credit scoring system from ROR to Java
- Test new features and updates to existing functionality to ensure the best user experience

Logistics

- Competitive salary and stock options
- Full time
- Remote
