

Almond Fintech

Technical Product Manager - Remote

About Us:

Financial barriers continue to impact quality of life for people globally. Almond is a fintech company on a mission to remove barriers between people and money through borderless financial technology — and we're growing! Want to make a real impact on a global scale? Interested in working (remotely) alongside some of the industry's brightest minds? We're actively seeking a talented Technical Product Manager to join our team. If you have what it takes, we want to meet you.

The Role:

As our first Technical Product Manager, you will sit at the intersection of business operations, partnerships, and product management. This role will work closely with our engineering team, comprised of in-house and contractor engineers, to further improve our credit product.

You will be working cross-functionally and shepherding the release of our new credit product, overseeing A/B testing, prioritizing features, and ensuring features/fixes are completed in line with pilot timelines. Additionally, you'll be prioritizing the release of features through ideation, roadmapping, and development while consistently meeting shipping deadlines.

Requirements:

- 5+ years of experience in product management
- Ability to cross-functionally collaborate across product and engineering departments
- Proven track record creating user-centric designs
- Ability to manage relationships with external clients
- Experience with data analytics and visualization
- Subject matter expert on offerings and associated markets
- Ability to effectively communicate across multiple geographies
- Set the priorities for the team and own the delivery
- Familiarity with machine learning is a plus

Responsibilities:

- Manage a contractor development team and in-house engineer
- Work closely with the product lead and external partners to understand product requirements
- Lead the step-by-step product management process to execution, meeting pilot deadlines
- Take initiative and work with the development team to determine how features should be implemented when and why
- Contribute ideas for product development informed by customer conversations and feedback

- Manage product transition from ROR to Java
- Test new features and updates to existing functionality ensuring optimal UX
- Track KPIs and keep the team focused using Click Up

Benefits and Culture:

- Competitive compensation package, including stock options
- Flexibility of a fully-remote organization
- Opportunity to influence the frontline of fintech
